

HELIOS®

 SALES 386-255-0234

The Helios TXL856 is a premier engineering solution designed specifically for massive, extra-large format flat-panel displays requiring premium tilt functionality. Built with heavy-gauge steel structural components, this professional mount delivers unparalleled stability, robust safety, and an incredibly low-profile aesthetic for standard residential and demanding commercial integrations.

Features:

- **Broad Display Compatibility:** Fits 50" to 110" TVs. Always check the VESA pattern and weight of the specific TV model to determine maximum size and accurate engineering compliance.
- **Advanced Precision Tilt:** Offers +3° to -10° vertical tilt adjustment to drastically minimize ambient glare and optimize overhead lines-of-sight.
- **Ultra-Slim Profile:** Sits close to the wall at a mere 2.95" (75mm) depth when collapsed, maintaining a clean architectural appearance.
- **Extended Maintenance Clearance:** Pulls out up to 6.26" (159mm) from the wall to facilitate easy cabling access and simplified system servicing.

Specifications:

- Wall Plate Total Width 1021 mm (40.19")
- Wall Plate Outer Height 951 mm (37.44")
- Internal Mechanism Height 315mm (12.40")
- Minimum Wall Profile Depth 75 mm (2.95")
- Maximum Extended Distance 159mm (6.26")
- Universal bracket design natively covers configurations up to 850 x 600 mm:

200 x 200	200 x 300	300 x 200
300 x 300	400 x 200	400 x 300
400 x 400	600 x 400	850 x 600
